

Increase your senses during the heat of battle

Anticipating potential dangers to firefighters and developing instruments that they can rely on, has been our challenge for more than 50 years. The knowledge we've accrued has led to numerous industry firsts, and given us a keen sense of the types of products needed to combat the rigors of firefighting. Today, routine firefighting tasks, including bending and crawling, can cause severe compression burns. The 6TH Sense, distributed by Gas Analysis Systems Pty Limited gives you the confidence and time you need to get out quickly—when time matters most. For more information contact Gas Analysis Systems on +61 (0)3 9584 1084 or visit our website at www.wtcorp.com.au.

The innovative new 6TH Sense

was developed specifically to aid in the prevention of compression burns during the heat of battle and warn of impending danger. The 6TH Sense increases firefighter awareness to temperature change and prolonged thermal exposure. Utilizing state-of-the-art sensor technology, it provides both audible and visual warnings of dangerous heat levels on exposed surfaces, which if compressed, can cause serious burns.

Weighing just 7 ounces, the 6TH Sense delivers superior protection in a small, ergonomically designed flame and water resistant housing. The 6TH Sense was designed with firefighters in mind, incorporating many features found on the legendary Air-Pak Fifty® SCBA and Pak-Alert® SETM, such as the gloved-hand-accessible acknowledge switch and the same rugged construction.

The 6TH Sense positions easily on a helmet and can be easily moved from firefighter to firefighter. With both audible and 4-position LED visual alert, latching heat alarm, and automatic on/off feature, the 6TH Sense provides the ultimate in alarm protection. Firefighter tested, 2-year battery life, low battery warning and full 1-year warranty provide added confidence during battle.

Increase your senses in and around the fire ground, add the 6TH Sense to your firefighting arsenal.

Stock #	Description
40014900	6TH Sense - Both audible and 4-position LED visual alert, latching heat alarm, and automatic on/off feature.
